

CJ's Business Solutions are your online audit specialists

Do you know how your business appears online? We can help with comprehensive online audits to boost your profile and deal with adverse posts about you.

Whether or not you have a website it's important to know how your business is being viewed online.

At CJ's Business Solutions we recommend regular (6 monthly) online audits be conducted for your business.

Depending on the nature of your business, number of branches etc, audits take 2-3 hours to complete.

As part of the process we:

- Search for & seek to fix any negative references
- Search for & seek to remove any false references
- Compare your business' performance online against your competitors
- Aim to improve your business' profile through connection to a wide variety of online directories
- Check to see if your website (if you have one) is performing over a range of keyword searches and make recommendations for changes

Want to know how to do an online audit yourself?

As well as conducting audits we also provide training to help small business people take control of their own online presence and marketing. We can provide both group training or one-on-one sessions for individual businesses.

Want more information or a quote?

For more information about an online audit either individually or in a group training setting contact CJ's Business Solutions on 0435 432 203 or email cj@cjsbusinesssolutions.com.au.
